CEO Message

“We are committed to the long-term socio-economic development of the D.R.C and its neighbors”

Vision & Values

Our **Vision** is to be a world class integrated copper producing company leveraging mineral and human resources to enhance value and be the pride of Africa.

All business and operations at Harcros Mines Limited (HML) are guided by six **values** which are Integrity, Respect, Quality, Continuity, Social Responsibility and Entrepreneurship

Corporate Social Responsibility

Our services encompass the various stages of copper mining, from exploration to production, and the responsible management of the associated social and environmental impacts.

Supporting social initiatives, such as education, healthcare, and infrastructure development, in the areas where the company operates is one of our obligations. See our full list of services below.

Our Services

- Exploration and Mining**
 Conducting geological surveys and extracting copper ore from mines through open-pit or underground mining methods.
- Ore Processing, Smelting and Refining**
 Processing the mined ore through crushing, grinding, and concentration processes to produce copper concentrates and smelting the concentrates to produce copper cathodes or other
- Export and Sales**
 Marketing and selling copper products domestically and internationally, often through partnerships or direct sales to copper buyers and smelters.
- Research and Development**
 Investing in technology and innovation to improve mining efficiency and reduce environmental impacts.
- Compliance and Permitting**
 Ensuring compliance with local and international regulations, securing mining permits, and meeting environmental and safety standards.

Additional Services

Environmental Management

Implementing environmental protection measures & sustainable mining practices to mitigate the environmental impact of mining activities.

Infrastructure Development

Building & maintaining the necessary infrastructure to support mining operations.

Workforce Management

Recruiting, training, and managing a skilled workforce for the mining operation.

Community Engagement

Engaging with locals to address social and economic needs for positive community relations.

Harcros Mines Ltd is dedicated to sustainable and responsible mining practices, implementing measures to mitigate environmental impact and promote the standard of living for the community.

Our Products

01 Copper Cathodes & Copper Ore Concentrate

Copper is an important material in the world today used for purposes like making alloys like brass, bronze and alloy steel with applications in transportation, electrical appliances, machinery, defense and construction.

02 Cobalt

Cobalt's use in rechargeable batteries is one of its fastest growing applications. The cobalt found at the mines is produced in an alloy form (copper-cobalt alloy) which is marketed to cobalt processing plants around the world.

Alloys containing cobalt are used in the production of jet engines & gas turbine engines for energy generation.

03 Gold Bars

Uganda and DR Congo have vast gold deposits estimated at more than 100 million tonnes with an approximated value of more than USD \$42 Trillions.

Harcros Mines Limited, as a company holds gold production licenses in Bakavu, Katanga and Karamoja-northern Uganda.

Why Choose us?

Our gold mines produce raw gold in form of nuggets and dust which is typically about 60-80 per cent pure gold which is later refined into gold of different forms and grade of gold.

- ✓ Abundant Copper Resources of High Copper Grades.
- ✓ Growth Potential due to increasing growing global demand for this metal.
- ✓ Government Support which includes steps to attract foreign investment in the mining sector.
- ✓ Skilled Workforce in the DRC with experienced mining professionals.

Our Values

- Integrity
- Safety
- Environmental Responsibility
- Community Development
- Innovation
